

When it has to be as good as new.

PROCESS

Quality processes are the standard for Memorial's Guarantee. All machined components are precisely measured to match OEM standards, and "wear" components are replaced. Our dedication to continuous process improvement keeps us at the forefront of our industry. We carefully document our processes to ensure quality control. We invest in advanced tools and collaborate with industry experts to increase efficiency and meet higher quality standards. Our unwavering commitment to process improvement enables us to stay ahead of our competitors.

PRECISION

The technicians at Memorial are certified and have received factory training for remanufacturing engines from Waukesha® and other OEMs, such as Caterpillar®. Precision is crucial in this process, which involves consistently replicating the original specifications. We are dedicated to achieving precision and accuracy, translating into dependable, consistent, and valuable equipment.

PERFORMANCE

Achieving consistent success in remanufacturing industrial engines may seem straightforward, but it demands exceptional commitment and motivation, which is exactly what we offer at Memorial. Our remanufactured components, such as cylinder blocks and heads, pumps, rocker arms, and more, adhere to the latest OEM specifications. Moreover, our components come with a warranty equivalent to a brand-new engine.
